

Advanced Manufacturing and 21st Century Career Opportunities

CAMPS represents Washington State manufacturers engaged in 21st Century Advanced Manufacturing products and processes. In this condensed military-to-manufacturing workshop, learn how this industry focused and employer driven program informs and prepares veterans for entry-level, semi-skilled, skilled and leadership positions in the manufacturing industry. Military personnel are natural leaders skilled in operating advanced weapons, communication, and support equipment and have readily transferrable skills. Your skills, experiences, and motivations make you attractive candidates.

Upcoming Military to Manufacturing (M2M) Career Pathway Events

M2M Orientations – One-hour presentation and opportunity to hear an overview of the M2M Program. Questions and answer opportunities included.

M2M Class Schedule – Two-day workshop designed to provide an understanding of Manufacturing processes and career opportunities, how you can translate your skills to manufacturing careers, and resume and interviewing assistance to successfully secure manufacturing career opportunities.
